Air Conditioning Installations

When it comes to AC Installation, there are numerous elements that the AC technicians must take into consideration viz. the compatibility of your room, your personal life-style habits, the dimensions of your cooling unit because some of those elements could make it hard to cool your home and control humidity. It is consequently extremely essential that you discuss all about your cooling alternatives with skilled specialists to make sure you are getting the right AC system for your comfort. All of our heating and AC installations services encompass a one-year assurance and meet local safety and building codes. Our staff of professional AC installers are in-house staff, trained, experienced and will install your new Air Conditioning unit in the right manner.

Our AC Installation services include :

- Preventive maintenance and non-scheduled maintenance of Air conditioning equipment
- Replacing mechanical seals, bearings, belts, piping and fittings etc.
- Re-packing pumps and valves.
- Checking for proper alignment.
- Repairing fan coil units.
- Brazing and soldering.
- Calibrating controls.
- Working on pressure vessels,
- Record and report completed repairs and items that require further attention.
- Assist in start-up, shut-down and operation, ventilation and air conditioning equipment.
